

Standing by (1314)

If you feel alone, just look around you
And call my name, you 'll see me there
I won't let you down now that I found you
Let love surround you, you find it everywhere

Refr: When you need someone to hold you
I'll be waiting, I'm standing by
Through the good and through the bad times
I'll be with you, I'm standing by

If you wait in the stillness of the night
I'll be there and I'll make you feel all right
When you need a friend to hold you
I'll be waiting I'm standing by

When the world seems heavy on your shoulders
And troubles come way down your mind
There's a friend, you know, you can depend on
Yes I'll be there, always standing by your side

Refr: When you need someone to hold you
I'll be waiting, I'm standing by
Through the good and through the bad times
I'll be with you, I'm standing by

If you wait in the stillness of the night
I'll be there and I'll make you feel all right
When you need a friend to hold you
I'll be waiting I'm standing by
I'll be with you I'm standing by, standing by.
